BUILT FOR THE EXTREME.

BUILT
TO LAST.

Our tactical fabrics are engineered for operations under the toughest conditions. They combine maximum functionality with uncompromising resilience, delivering protection you can rely on. For emergency and security forces, this means peak performance in every mission.

SPECTR
K2799 WR IRR
150 g/m²

ABRASION-RESISTANT

Designed for maximum stress, the fabric shows high resistance to friction and abrasion. It withstands even intensive use and remains reliably durable.

WATERPROOF

Rain and moisture cannot harm the fabric. Thanks to its water-impermeable properties, it offers reliable protection and keeps the wearer dry.

DIN EN ISO 20811

S14513 IRR WR
250 g/m²

FLAME-RETARDANT

When every second counts, this fabric provides crucial protection. It is flame-retardant and reliably delays the spread of fire – for greater safety in extreme situations.

DIN EN ISO 15025

DIN EN ISO 6941

IRR

This specially developed fabric absorbs infrared radiation, making it difficult to detect with night-vision devices. It enables discreet action in demanding environments. Modified, compliant with German Technical Delivery Conditions (TL-compliant)

POLAR
S2018 WR PU
275 g/m²
