BUILT FOR THE EXTREME.

ENGINEERED FOR PROTECTION.

Our fabrics for protective clothing and workwear are designed for maximum safety and functionality. They provide reliable protection in demanding working environments while ensuring a high level of comfort. This makes even the most challenging tasks safer and more efficient.

K4510 WR BOND
330 g/m²

FOREST MODIFICATION

Optimised for forestry applications, the textile meets the highest requirements for visibility and robustness.

ABRASION-RESISTANT

Designed for maximum stress, the fabric shows high resistance to friction and abrasion. It withstands even intensive use and remains reliably durable.

K2820 WR AP
220 g/m²

ANTISTATIC

The material reduces electrostatic charging and ensures safe use in everyday working environments. Static effects are effectively minimised.

HIGH VISIBILITY

Bright colours and retroreflective surfaces ensure that the fabric remains clearly visible, even in poor lighting conditions.
DIN EN ISO 20471

HALO
S1488
125 g/m²
