

# MATERIALITY ASSESSMENT GETZNER GROUP

getzner

## THE GETZNER GROUP

The companies of the Getzner Group – Getzner, Mutter & Cie., Getzner Textil and Getzner Werkstoffe – stand for tradition, innovation and high-tech products. As a family-owned enterprise with over 200 years of history, curiosity is what drives us: Our continuous commitment to progress and an openness to new ideas have made us internationally successful, with locations around the world.

## MATERIALITY ASSESSMENT

The Materiality Assessment, developed with input from stakeholders, forms the basis of the Getzner Group’s sustainability management and underpins reporting in line with the Corporate Sustainability Reporting Directive (CSRD).

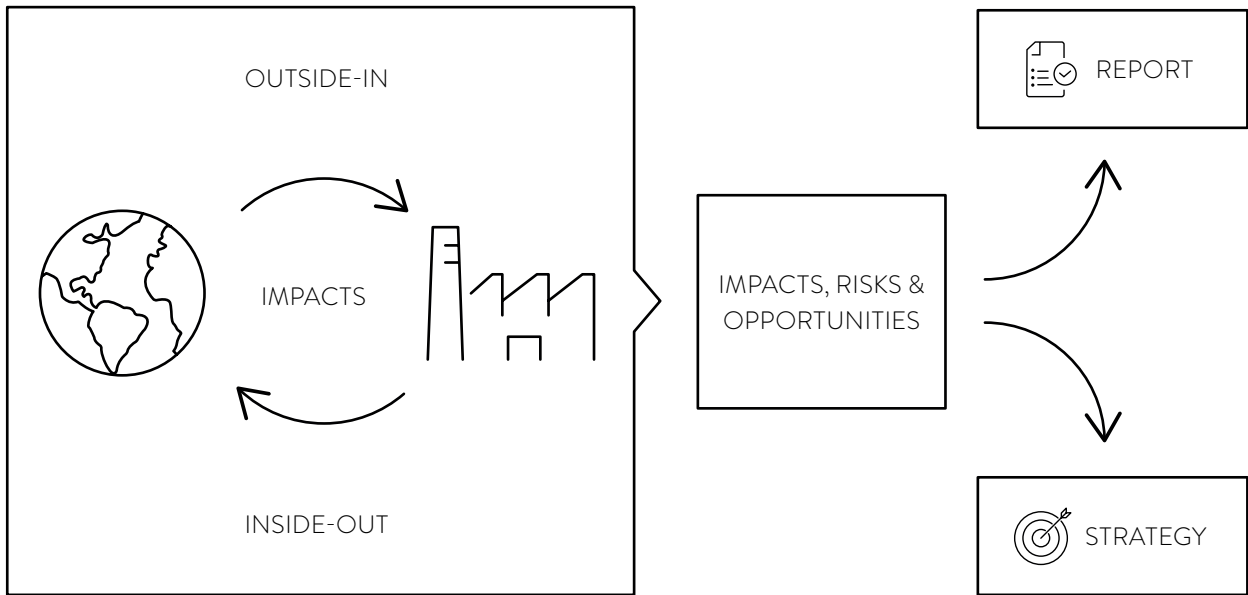

All aspects of our products’ life cycle were considered across the entire value chain – from cradle to grave.

## HOW WAS THE ASSESSMENT CONDUCTED?

The Materiality Assessment is based on the principle of double materiality. It was developed in 2024 with external experts and verified by an independent audit firm.

It considers both the impact of external sustainability factors on the company (outside-in) and the impact of company activities on the environment and society (inside-out) along the full value chain.

### STAKEHOLDER DIALOGUE

A key part of the Materiality Assessment is the stakeholder dialogue. Through online surveys and personal interviews, the views of key stakeholders were collected and included in the assessment.

Interviewees included customers, suppliers of raw materials and electricity, financial institutions, and representatives from research bodies and industry associations. This process allows the relevance of different topics to be assessed and prioritised from both the company's and stakeholders' perspectives.

## WHICH TOPICS ARE MATERIAL FOR THE GETZNER GROUP?

Based on the findings of the Materiality Assessment, four overarching areas of action have been defined. These serve as a framework for developing the company's sustainability strategy and will be incorporated into CSRD reporting. Specific measures and projects are currently being developed.

### OUR STRATEGIC AREAS OF FOCUS

Climate risks

Energy and supply security

Decarbonisation

CO<sub>2</sub> reduction  
Energy efficiency  
Energy mix

Circular economy

Process circularity  
Cradle-to-Cradle concept  
Recyclable materials

Sustainable supplier engagement

Sustainable sourcing
